

Screening Compounds for Agrochemical Discovery

I would like to offer you our new products - screening compounds for agrochemical research and development. The focused compound libraries were designed to facilitate a process of finding new agrochemicals within the fields of weed, pest and disease control:

- [Herbicides-Like Library](#)
- [Insecticides-Like Library](#)
- [Fungicides-Like Library](#)

The libraries provide an excellent basis for agriculture discovery projects. All compounds are in stock, cherry-picking is available.

Thank you for your consideration.

If you are interested in any of this libraries, please feel free to contact me for more details.

I am looking forward to your reply.

Best regards,

Andriy Dmytrenko, MBA

Director of Business Development and Marketing
